Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
15	15			15	105	5

*Navedena porazdelitev ur velja, če je vpisanih vsaj 15 študentov. Drugače se obseg izvedbe kontaktnih ur sorazmerno zmanjša in prenese v samostojno delo. / This distribution of hours is valid if at least 15 students are enrolled. Otherwise the contact hours are linearly reduced and transferred to individual work.

Nosilec predmeta / Lecturer:	Prof. dr. Metka Filipič Doc. dr. Bojana Žegura

Jeziki / Languages:	Predavanja / Lectures: slovenski / angleški Slovene / English
	Vaje / Tutorial: slovenski / angleški Slovene / English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Zaključen študij druge stopnje naravoslovne ali tehničke smeri ali zaključen študij drugih smeri z dokazanim poznavanjem osnov področja predmeta (pisna dokazila, pogovor).	Completed second level studies in natural sciences or engineering or completed second level studies in other fields with proven knowledge of fundamentals in the field of this course (certificates, interview).

Vsebina:	Content (Syllabus outline):
1. Uvod v toksičnologijo: osnovni koncepti nevarnosti in toksičnosti, povezava med dozo in učinki - zdravila, strupi in nutrienti, naravne in sintetične kemikalije, homeostaza preprečevanje zastrupitev. 2. Dejavniki, ki vplivajo na tveganje za zastrupitve: kako snovi krožijo v okolju, odvisnost dejanske izpostavljenosti od vrste izpostavljenosti, odvisnost toksičnih učinkov od interakcij kemikalije v telesu (toksikokinetika, toksičnokinetika), učinki na organe, posebni učinki (karcinogeneza, mutageneza,	1. Introduction: basic concepts of hazard and toxicity, dose-response relationships – drugs, poisons and nutrients, natural and synthetic chemicals, homeostasis, avoiding poisoning. 2. Factors affecting risk of poisoning: how substances move through environment, how effective exposure depends on the route of exposure, how toxic effects depend upon how the body reacts with chemicals (toxicokinetics, toxicodynamics), effects on organs, specific toxic effects (carcinogenesis, mutagenesis, reproductive toxicity, immunotoxicity) and their

<p>reprodukтивна токсиčност, имунотоксиčност) и нивоји молекуларни механизми, учинци комбинираних изостављености, разлике међу акутним и хроничним изостављеностима.</p> <p>3. Виру и коришћење токсиколошких података: токсиколошки тести (in vivo, in vitro, токсикогеномика) интерпретација података, оцена неизвесности, мониторинг изостављености.</p> <p>4. Врсте хемикалиј и опасности за живот, које утичу на здравље: топила, ковине, кисeline и базе, пестициди, наноделци, природни токсини, адитиви за исхрану, производи, који настају при преради живота.</p>	<p>molecular mechanisms, effects of combined exposures, differences between acute and chronic exposure.</p> <p>3. Sources and use of toxicological data: Toxicological testing (in vivo, in vitro, toxicogenomics), interpretation of data, hazard assessment, exposure monitoring.</p> <p>4. Common types of chemicals and food contaminants that cause health threats: solvents, metals, acids and bases, pesticides, nanoparticles, natural toxins, food additives, side products of food processing.</p>

Temeljni literatura in viri / Readings:

C.D. Klaasen editor. Casarett and Doull's Toxicology: 7th edition, McGraw-Hill, 2008 (izbrana poglavja/selected chapters)

J.A. Timbrell, "Principles of Biochemical Toxicology, Fourth Edition," Informa Healthcare, New York (2008).

Introduction to Food Toxicology T. Shibamoto and L. Bjeldanes (2nd Ed 2009) Academic Press, Inc. San Diego, CA

Pregledni članki s področja, tekoča periodika, spletna stran EU, druga učna gradiva... / review articles from the field, periodicals, EU website, other educational readings...

Cilji in kompetence:

- Razumevanje osnovnih токсиколошких принципов
- Razumevanje različnih vrst škodljivih учинков zaradi izostavљености токсиčним хемикалијама
- Razumevanje različnih механизамов дејствија токсиčних хемикалиј
- Razumevanje vrst изостављености токсиčним сновима
- Razumevanje и коришћење токсиколошких података
- Razumevanje концепта оценјевања твегања за здравје људи

Objectives and competences:

- Understanding basic toxicological principles
- Understanding different types of adverse effects of the exposure to toxic chemicals
- Understanding different mechanisms of action of toxic chemicals
- Understanding the types of exposure to toxic compounds
- Understanding and use of toxicological data
- Understanding the concept of risk assessment for human health

Predvideni študijski rezultati:

- Самостојно толмачење комплексних токсиколошких процесова
- Придобијавање токсиколошких података
- Критично оценјевање токсиколошких и епидемиолошких података
- Оценјевање твегања заради изостављености токсиčним сновима.

Intended learning outcomes:

- Independent evaluation of complex toxicological processes
- Acquiring toxicological data
- Critical assessment of toxicological and epidemiological data
- Assessment of risk upon exposures to toxic compounds.

Metode poučevanja in učenja:

Predavanja
Priprava seminarjev

Learning and teaching methods:

Lectures
Seminars

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
Seminar	50 %	Seminars
Ustni zagovor seminarske naloge	50 %	Oral defence of seminar work
