Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Znanje, ki je ekvivalentno izobrazbi druge stopnje ali univerzitetni izobrazbi s področja naravoslovja ali tehnologije.	Knowledge, which is equivalent to a second level or university degree from natural sciences or technology.
---	--

Vsebina predmeta

Sončni absorberji in sončni zbiralniki: materiali, tehnologije. Fotoelektrokemijski sistemi: delovanje Graetzlovih fotonapetostnih celic; priprava oksidov kovin prehoda; ionski redoks elektroliti z nanokompozitno strukturo; izdelava celic in meritve njihovih lastnosti. Pasivni sistemi za izrabo sončnega sevanja ("smart" windows): optično preklopni sistemi (elektrokromni, fotokromni in gasokromni sistemi). Materiali s fotokatalitskimi lastnostmi: nanoporozni titanov(IV) oksid, superhidrofilnost. Materiali in načrtovanje <ul style="list-style-type: none"> • osnovne značilnosti materialov, • energija: toplotno okolje, 	Course Content <p>Solar absorbers and solar collectors: materials, technologies.</p> <p>Photoelectrochemical systems: basic principles of the operation of photoelectrochemical Gretzel type photovoltaic cell; the preparation of components – nanocrystalline transition metal oxides acting as photoanodes, ionic-redox electrolytes with nanocomposite structure acting as a "hole" transporting media, assembling of the cells, efficiency measurements and the evaluation of their stability.</p> <p>Basic principles of the operation of the passive optical switching systems for light control in buildings: "smart" electrochromic windows, gasochromic systems and thermochromic and photochromic devices.</p> <p>The preparation and functioning of materials</p>

Cilji predmeta

Cilj predmeta je seznaniti študente s principi inženirskega načrtovanja, oblikovanja in sistemskega pristopa k reševanju problemov pri načrtovanju pametnih materialov in tehnologij.

Študent pridobi kompetence potrebne za delo na področju sistemov, naprav in materialov za izkoriščanje nekonvencionalnih energetskih virov.

Course Aims

The aim of this course is to acquaint students with the principles of engineering planning, design and systematic approach to planning of smart materials and systems.

Students will gain competences necessary to work in the research field of systems, facilities and materials for alternative energy sources.

Predvideni študijski rezultati

Znanje in razumevanje:

- Razumevanje predmetnega področja.

Vrednotenje in sinteza:

- obvladanje izbranih raziskovalnih metod, postopkov in procesov,
- razvoj kritične in samokritične presoje,
- sposobnost komunikacije raziskovalnih rezultatov v mednarodnem okolju,
- sposobnost dela v skupini,
- obvladovanje izdelave naprav za fototermično in fotoelektrično konverzijo sončnega sevanja.

Expected learning outcomes

Knowledge and understanding

- The student will understand this field of research.

Evaluation and synthesis:

- mastering selected research methods, procedures and processes,
- development of critical thinking and self-assessment,
- development of communication skills to present research results in an international environment,
- ability to cooperate in a team,
- mastering the production of photovoltaic and photoelectric devices for solar energy conversion.

Metode poučevanja in učenja	Learning and teaching methods	
<ul style="list-style-type: none"> Predavanja z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov). Seminarska naloga. Individualne in/ali skupinske konzultacije (diskusija, dodatna razlaga, obravnava specifičnih vprašanj). 	<ul style="list-style-type: none"> Lectures with active participation of students (presentation, discussion, questions, examples, solving of the problems). Seminar work. Individual and / or group consultation (discussion, additional explanation, specific questions). 	
Načini preverjanja znanja	Delež / Weight	Assessment
<p>Seminar in ustni izpit, v katerem kandidat dokaže poznavanje in razumevanje temeljnih vsebin predmeta in predstavi njihovo vključevanje v svoj raziskovalni projekt pred komisijo, ki jo sestavlja nosilec predmeta ter mentor podiplomca. K predstavitvi so vabljeni vsi sodelavci pri predmetu in v projektu.</p> <ul style="list-style-type: none"> ocenjuje se pisni del izpita; ocenjuje se ustni del izpita; ocena seminarske naloge. 	30 % 30 % 40 %	<p>Seminar and oral exam, in which the candidate demonstrates his/her knowledge and understanding of the essential course content, and presents how this new knowledge can be included in his/her research project – in front of the course leader and postgraduate's project supervisor.</p> <ul style="list-style-type: none"> written part of the exam; oral part of the exam; seminar work.
