

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Uvod v procesno varnost
Course title:	Introduction to the Process Safety

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Ekotehnologije, 3. stopnja	/	1	1
Ecotechnologies, 3 rd cycle	/	1	1

Vrsta predmeta / Course type	Izbirni / Elective
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	EKO3-781
---	----------

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
15	15			15	105	5

*Navedena porazdelitev ur velja, če je vpisanih vsaj 15 študentov. Drugače se obseg izvedbe kontaktnih ur sorazmerno zmanjša in prenese v samostojno delo. / This distribution of hours is valid if at least 15 students are enrolled. Otherwise the contact hours are linearly reduced and transferred to individual work.

Nosilec predmeta / Lecturer:	Prof. dr. Marko Gerbec
------------------------------	------------------------

Jeziki / Languages:	Predavanja / Lectures: slovenščina, angleščina Slovenian, English
	Vaje / Tutorial: slovenščina, angleščina Slovenian, English

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Znanje, ki je ekvivalentno izobrazbi druge stopnje ali univerzitetni izobrazbi s področja naravoslovja ali tehnologije.

Prerequisites:

Knowledge, which is equivalent to a second level or university degree from natural sciences or technology

Vsebina:

- Značilnosti preteklih večjih nesreč (zgodovinski pregled, trendi, odziv družbe).
- Prepoznavanje in ocenjevanje tveganj za vidik procesne varnosti (metode za ugotavljanje virov nevarnosti, izdelava scenarijev nesreč, metode in orodja za ocenjevanje teže posledic in njihove verjetnosti, potencial za verižne nesreče).
- Uporaba rezultatov ocene tveganja (varnostne analize) za zniževanje tveganj, presoja sprememljivosti in vplivov na okolje, načrtovanje zaščite in reševanja, obveščanje javnosti, prostorsko načrtovanje, itd.
- Sistemi obvladovanja procesne varnosti (management).
- Ocenjevanje kvalitete vodenja

Content (Syllabus outline):

- Characteristics of the past major accidents (historical overview, trends, societal response).
- Identification and assessment of process safety risks (methods for hazards identification, development of major accident scenarios, methods and tools for assessment of consequences and their likelihoods, domino effects potential).
- Use of the risk assessment results (safety analysis) for risk reduction, licensing procedures (tolerability assessment) related to the environmental impact assessment, emergency response planning, informing the public, spatial planning, etc.
- Process safety management systems.

<p>organizacij/obratov, ocenjevanje varnostne kulture, ocenjevanje in upravljanje človeške zanesljivosti.</p> <ul style="list-style-type: none"> Analize vzrokov izrednih dogodkov z nevarnimi snovmi. 	<ul style="list-style-type: none"> Assessment of management quality of the organizations/establishments, evaluation of the safety climate (culture), assessment and management of human reliability. Root cause analysis of the process safety incidents and accidents.

- Leveson, N., 2011. Engineering a Safer World: Systems Thinking Applied to Safety. MIT Press, Cambridge, MA, USA. ISBN: 9780262533690 (open access title!).
- Reason J., 2007. Managing the risk of organizational accidents. Ashgate. ISBN 1840141040.

Cilji in kompetence:

- Cilji:
- Razumevanje različnih vidikov varnosti (procesna, varnost pri delu, ipd.)
 - Vrednotenje principov managementa procesne varnosti v industrijskih organizacijah, državnih organih in raziskovalnih organizacijah
 - Vrednotenje uporabnosti analitskih metod pri ocenjevanju tveganj

Splošne kompetence:

- Poznavanje izbranih raziskovalnih metod, postopkov, procesov in orodij
- Izbira metod in orodij za ocenjevanje tveganj
- Vrednotenje povezanih negotovosti
- Sklepanje o pomenu tveganj na odločanje (sistemi vodenja)
- Sposobnost uporabe znanja v praksi
- Načrtovanje dela v skupini

Objectives and competences:

Knowledge and understanding

- Detailed understanding of various safety aspects (process, occupational, etc.)
- Evaluation of process safety management principles in industrial organizations, statutory agencies and research organizations
- Evaluation of usefulness of analysis methods for risk assessment

General Competences:

- To master selected research methods, procedures, processes and tools
- Select method and tools for risk assessment
- Develop critical thinking and self-assessment
- Evaluate related uncertainties
- Infer the meaning of risks on the decision making (management systems)
- Application of the obtained knowledge
- Able to cooperate in a team

Predvideni študijski rezultati:

Znanje in vrednotenje:

- Umestitve in razlikovanja vidika procesne varnosti napram sorodnim vidikom

Intended learning outcomes:

Knowledge and understanding of:

- Positioning and differentiation of the process safety aspect against other similar aspects

<ul style="list-style-type: none"> • Družbenih in organizacijskih ukrepov za obvladovanje procesnih tveganj • Specifičnih metod, postopkov in orodij pri ocenjevanju tveganj • Pomena obvladovanja tveganj pri odločitvah (realizacija strategij, ipd.) 	<ul style="list-style-type: none"> • Social and organizational measures to manage process safety risks • Specific methods, procedures and tools for risk assessment • The meaning of risk management at decisions (strategy realization, etc.)
--	---

Metode poučevanja in učenja:

- Predavanja
- Delavnice
- Seminarji

Learning and teaching methods:

- Lectures
- Workshops
- Seminars

Delež (v %) /

Weight (in %)

Assessment:

Načini ocenjevanja:		
Ustni izpit, v katerem kandidat dokaže poznavanje in razumevanje temeljnih vsebin predmeta in predstavi njihovo vključevanje v svoj raziskovalni projekt, ali seminarško delo. K predstavitvi so vabljeni vsi študenti pri predmetu in sodelavci pri v projektu/seminarju.	100 %	Oral exam, in which the candidate demonstrates his/her knowledge and understanding of the essential course content, and presents how this can be included in his/her research project or seminar work. The presentation shall be attended also by all students at the curse and project/seminar participants.
