

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Biologija matičnih celic
Course title:	Biology of Stem Cells

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Nanoznanosti in nanotehnologije, 3. stopnja	Bioznanosti	1	1
Nanoosciences and Nanotechnologies, 3 <sup>rd</sup> cycle	Biosciences	1	1

Vrsta predmeta / Course type	Izbirni / Elective
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	NANO3-791
-------------------------------------------------------	-----------

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
15	15			15	105	5

\*Navedena porazdelitev ur velja, če je vpisanih vsaj 15 študentov. Drugače se obseg izvedbe kontaktnih ur sorazmerno zmanjša in prenese v samostojno delo. / This distribution of hours is valid if at least 15 students are enrolled. Otherwise the contact hours are linearly reduced and transferred to individual work.

Nosilec predmeta / Lecturer:	Prof. dr. Tanja Dominko
------------------------------	-------------------------

Jeziki / Languages:	Predavanja / Lectures:	Slovensko / angleško Slovene / English
	Vaje / Tutorial:	Slovensko / angleško

#### Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Predmet lahko vpišejo študentje, ki so uspešno opravili izpit iz Biologije celice na dodiplomskem ali poddiplomskem študiju.

#### Prerequisites:

Students that have successfully passed the exam of Cell Biology in undergraduate or postgraduate studies can enrol.

#### Vsebina:

- I. Matične celice v razvoju in regeneraciji**
1. Embriogeneza in embrionske matične celice (biokemijski in biološki procesi razvoja)
  2. Inducirane matične celice – indukcija pluripotence
  3. Matične celice v tkivnem inženirstvu  
Matične celice – etika in politika
- II. Matične celice v bolezenskih stanjih**
1. Potencialna uporabnost matičnih celic v raznih boleznih
  2. Transformacija vs. (de-)diferenciacija
  3. Rakave matične celic
  4. Proizvodi na osnovi matičnih celic – najnovejše tehnologije

#### Content (Syllabus outline):

- Biology of Stem Cells**
- I. Stem cells in development and regeneration**
1. Embryogenesis and embryonic stem cells (biochemical and biological processes)
  2. Induced stem cells –pluripotency induction
  3. Stem cells in tissue engineering
  - Stem cells - ethics and politics
- II. Stem cells in disease**
1. Potential of stem cells application in various diseases
  2. Transformation vs. (de-) differentiation
  3. Cancer stem cells
  4. Stem cell products - state of the art technologies

**Temeljni literatura in viri / Readings:**

- Ulrich Henning (ed): Perspectives of Stem Cells, Springer, ISBN: 978-90-481-3375-8
- Vinagolu K. Rajasekhar (ed), Mohan C Vemuri: Regulatory Networks of Stem Cells, Springer, ISBN: 978-1-60327-226-1

**Cilji in kompetence:**

- Študentje se seznanijo z osnovnimi lastnostmi različnih vrst matičnih celic
- Pridobivanje sposobnosti analiziranja in interpretacije osnovne znanstvene literature
- Razumevanje sodobnih molekularnih tehnik v raziskavah matičnih celic
- Razumevanje vloge matičnih celic v različnih bolezenskih stanjih

**Objectives and competences:**

- Students acquire knowledge of basic characteristics of different types of stem cells
- Ability to analyse and evaluate primary literature
- Understanding of modern molecular techniques in stem cell research
- Understanding the role of stem cells in different diseases

**Predvideni študijski rezultati:**

- izkazati znanje o bioloških metodah matičnih celic in molekularnih mehanizmih, ki vodijo k pluripotenci
- izkazati razumevanje molekularne biologije in biokemijskih tehnik, ki se uporabljajo pri raziskavah matičnih celic
- razviti spretnosti za vrednotenje strategij diferenciacije za aplikacije celične terapije
- izkazati razumevanje molekularnih razlik in funkcij izvornih celic, pridobljenih iz različnih virov
- analiziranje in interpretacija znanstvene literature
- razumevanje prednosti in slabosti celične terapije
- uporaba gornjega znanja za koherentno oceno terapij, ki temeljijo na matičnih celicah, gensko spremenjenih celičnih produktov in etike
- dokazati razumevanje in spoštovanje etičnih vprašanj pri terapiji z matičnimi celicami

**Intended learning outcomes:**

- Demonstrate knowledge of stem cell biology and molecular mechanisms leading to pluripotency
- Demonstrate an understanding of molecular biology and biochemistry techniques used in stem cell research
- Develop skills to evaluate differentiation strategies for cell therapy applications
- Demonstrate understanding of molecular differences and functions of stem cells derived from different sources
- Master analysis and interpretation of primary scientific literature
- Understand advantages and disadvantages of cell based therapeutics
- Apply the above knowledge for coherent appraisal of stem cell-based therapies and genetically modified cell based products and ethics
- Demonstrate an understanding and appreciation for ethical issues in stem cell therapy

**Metode poučevanja in učenja:**

- Osnove predmeta, podane v sklopu predavanj
- Posamezna vroča poglavja študentje samostojno obdelajo v obliki seminarja
- Samostojni projekt

**Learning and teaching methods:**

- Lectures on subject basics
- Student seminar preparation on certain currently hot topics
- Independent project

Delež (v %) /

**Načini ocenjevanja:**Weight (in %)    **Assessment:**

• Ustni izpit iz splošnega dela	20 %	• Oral exam of the basic theoretical part
• Ocena od seminarja	30 %	• Seminar assessment
• Samostojni projekt	50 %	• Independent project
