

**UČNI NAČRT PREDMETA / COURSE SYLLABUS**

<b>Predmet:</b>	Tehnika za trajnostni razvoj
<b>Course title:</b>	Sustainable Engineering

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Ekotehnologije, 2. stopnja		1	1
Ecotechnologies, 2 <sup>nd</sup> cycle		1	1

**Vrsta predmeta / Course type** Izbirni / Elective

**Univerzitetna koda predmeta / University course code:** EKO2-866

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
30	30			30	210	10

*\*Navedena porazdelitev ur velja, če je vpisanih vsaj 15 študentov. Drugače se obseg izvedbe kontaktnih ur sorazmerno zmanjša in prenese v samostojno delo. / This distribution of hours is valid if at least 15 students are enrolled. Otherwise the contact hours are linearly reduced and transferred to individual work.*

**Nosilec predmeta / Lecturer:** Prof. dr. Peter Glavič

**Jeziki / Predavanja / Lectures:** slovenščina, angleščina  
**Languages:** Slovenian, English  
**Vaje / Tutorial:**

**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Vpis v 1. semester 2. stopnje.  
 Znanje, ki je ekvivalentno izobrazbi prve stopnje ali visoki strokovni izobrazbi s področja naravoslovja ali tehnologije.

**Prerequisites:**

Inscription into the 1<sup>st</sup> semester of the master degree.  
 Knowledge, which is equivalent to a first level or professional degree from a natural science, engineering or technology.

**Vsebina:**

- Cilji trajnostnega razvoja
- 12 načel trajnostne tehnike
- Ekonomski in družbeni temelj trajnosti
- Minimiranje odpadkov, ničelni odpadki  
Termodinamska metoda minimiranja porabe energije, snovi in voda (analiza uščipa, učinkovitost virov)
- Virsko učinkovita in čistejša proizvodnja
- Kritične surovine, industrijska ekologija, krožno gospodarstvo
- Poznavanje in uveljavljanje ekotehnoloških zahtev za izbrane procese in opremo

**Content (Syllabus outline):**

- Sustainable development goals
- 12 principles of sustainable engineering
- Economic and social pillar of sustainability
- Minimizing wastes, zero Thermodynamic method of minimizing the consumption of energy, materials and water (pinch analysis, resource efficiency)
- Resource efficient and cleaner production
- Critical raw materials, Industrial ecology, circular economy
- Knowledge and enforcement of ecotechnological requirements for the

- Zasnova in kritična analiza masnih in energijskih bilanc procesov
- Primerjalna analiza parametrov za ekonomsko oceno procesov, merjenje trajnostnega razvoja

- selected processes and equipment
- Concept and critical analysis of the mass and energy balances of processes
- Comparative analysis of parameters for economic assessment of processes, sustainability metrics

### Temeljni literatura in viri / Readings:

- D. T. Allen, D. R. Shonnard, Sustainable Engineering: Concepts, Design and Case Studies, Prentice Hall, 223 str., 2012

- R. Constanza et al., An Introduction to Ecological Economics, CRC Press, Taylor & Francis, 356 str., 2014
- Towards the Circular Economy, 1–3, Ellen McArthur Foundation, 2013–2014, glej/see: <https://www.ellenmacarthurfoundation.org/publications>.
- D. F. X. Mathaisel, J. M. Manary, N. H. Criscimagna, Engineering for Sustainability, 518 str., 2012
- J. Kauffman, K. M. Lee (Eds), Handbook of Sustainable Engineering, Springe Reference, 1285 str., 2013
- Kubiszewski et al., Beyond GDP: Measuring and achieving global genuine progress, Ecological Economics, 93 (2013) 57–68
- J. Fresner e tal., Promoting resource efficiency in small and medium sized enterprises, UNEP, 2010
- Ad hoc Working Group, Report on critical raw materials for the EU, European Commission, 2014.

### Cilji in kompetence:

#### Splošne kompetence:

- obvladanje izbranih raziskovalnih metod, postopkov in procesov
- razvoj kritične in samokritične presoje
- sposobnost uporabe znanja v praksi
- kooperativnost, delo v skupini
- industrijska relevantnost

### Objectives and competences:

#### General Competences:

- Master selected research methods, procedures and processes
- Develop critical thinking and self-assessment
- Knowledge transfer into practice
- Cooperation and group work ability
- Industrial relevance

### Predvideni študijski rezultati:

- Razumevanje predmetnega področja
- Predmet pripravlja študente za delo na predmetnem področju.

### Intended learning outcomes:

- The student will understand this field of research
- The course prepares students to work in this field of work.

### Metode poučevanja in učenja:

Predstavitev seminarske naloge in ustni izpit, v katerem kandidat dokaže poznavanje in razumevanje temeljnih vsebin predmeta ter predstavi njihovo vključevanje v svoj nabor drugih predmetov. K predstavitvi seminarske naloge so vabljeni vsi sodelavci pri predmetu.

### Learning and teaching methods:

Seminar and oral exam, in which the candidate demonstrates his/her knowledge and understanding of the essential course content, and presents how this new knowledge can be included in his/her selection of courses – in front of the course students.

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
Predstavitev seminarske naloge	60 %	Seminar work presentation
Ustni zagovor	40 %	Oral exam
